

# Blackbaud Checkout

With the November 2019 update, **Blackbaud Checkout** now provides additional and enhanced functionality. Before you begin to work with the updated **Blackbaud Checkout**, review these features and enhancements.

## Improved Feedback when you Swipe Cards for a Payment

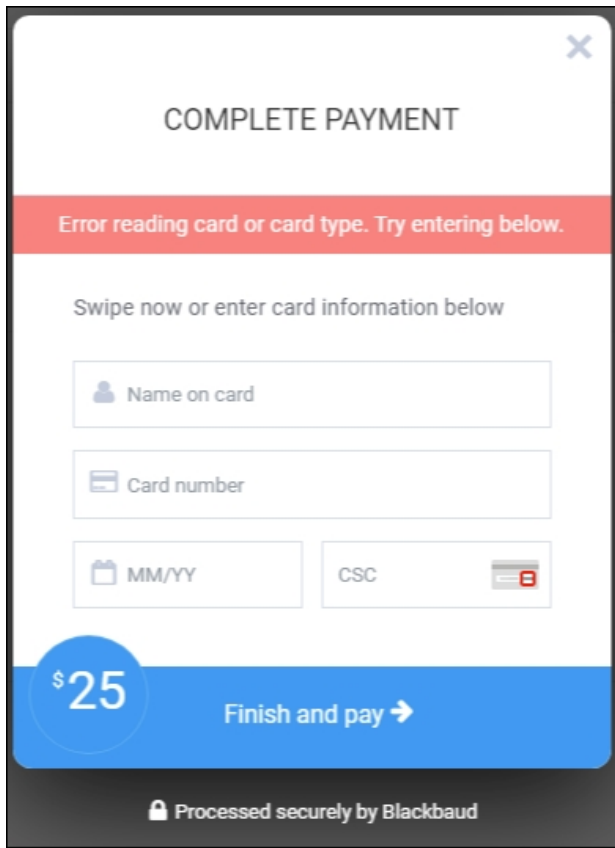

To help you better understand issues with a payment, you now get immediate feedback when you swipe a card.

- As soon as you swipe, you now see whether the card swiped successfully and is being read. Previously, you did not know if the swipe was successful and had to wait until the payment was submitted to confirm that the swipe was valid.

- Once you submit a transaction after a swipe, you now see an error message if the swipe was

unsuccessful. You can try swiping again or choose to enter the card information manually.

- You also receive an error if the card is invalid. This helps you determine if there is a problem with the card or with the swipe.

COMPLETE PAYMENT

Invalid card swipe data specified.

Swipe now or enter card information below

NAME ON CARD

Processed securely by Blackbaud

## Accept Transactions in Euros and Pounds through Apple Pay

**Blackbaud Checkout** can now accept Apple Pay transactions in Euros and Pounds Sterling. Previously, **Blackbaud Checkout** only accepted Apple Pay transactions in US Dollars and Canadian Dollars.
